

International Research Networking

Trans Eurasia Information Network: 3rd Generation Research and Education Networking Across Asia - A New Bandwidth Market

TEIN-08-005

David West, DANTE

PTC Industry Briefing

14 January 2008

International Research Networking

Who are we?

Delivery of **A**dvanced **N**etwork **T**echnology to **E**urope Ltd

- A Not for Profit Limited Company, UK-registered
- Our shareholders are Europe's National Research and Education Networks (NRENs)
- We build and operate pan-Europe GÉANT2 serving >30M users on 34 NREN national networks
- Our annual telecoms spends c 30 - 40M Euro, all tendered
- We also manage R&E regional networks outside Europe:
 - North Africa and Middle East (EUMEDCONNECT)
 - Latin America (ALICE)
 - Asia (TEIN2)

International Research Networking

TEN-34 Planned topology

(October 1996)

Numbers indicate capacity available (in Mbit/s)

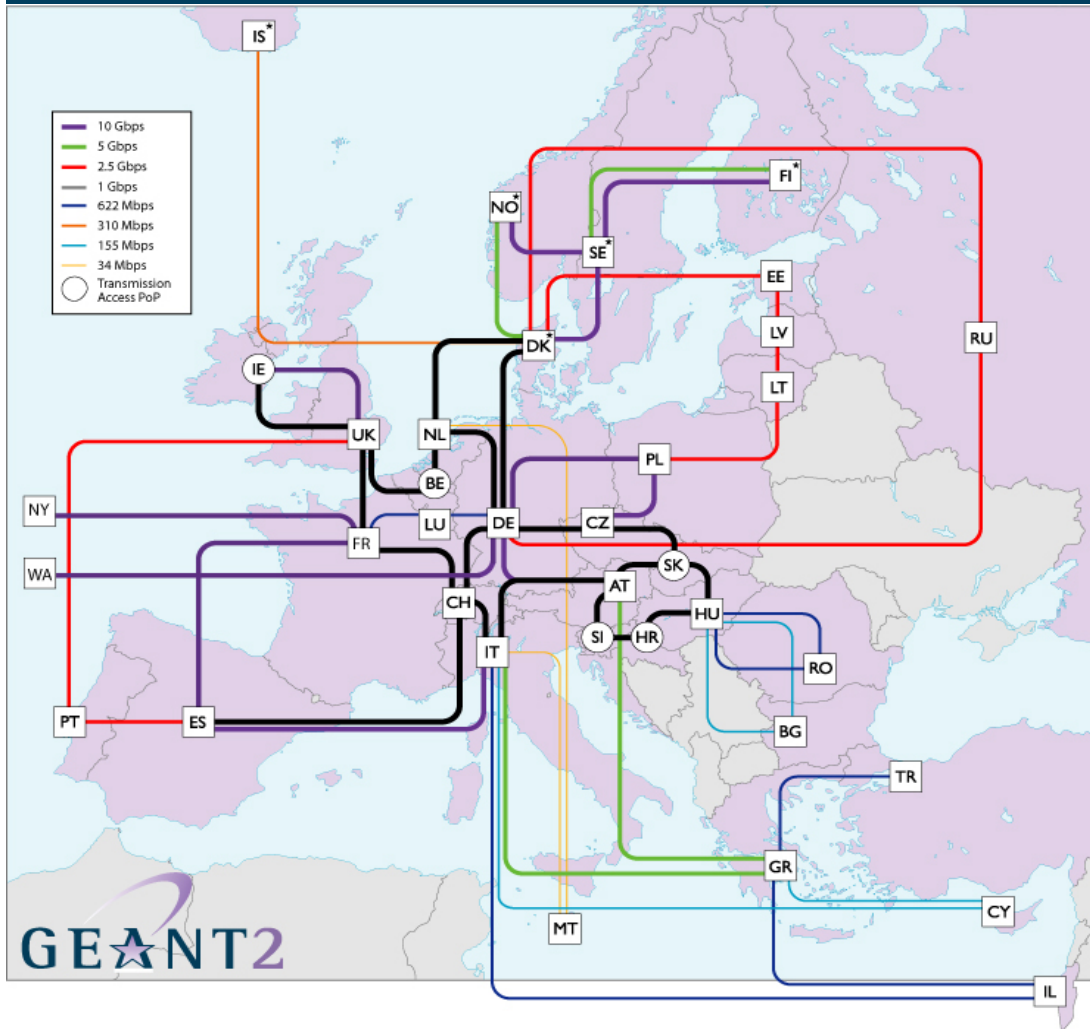

October 1996 Topology

34 MBps backbone

- IP subnetwork
- ATM VP subnetwork
- Interconnection point
- Leased line
- Planned connection

International Research Networking

Today's Topology

- 25 POPs
- Hybrid structure
- 11600km of dark fibre
- Multiple 10Gbps paths
- Global connections to other R&E networks
- 15 Connectivity providers

Drivers:
Technology
Cost reduction
User demand

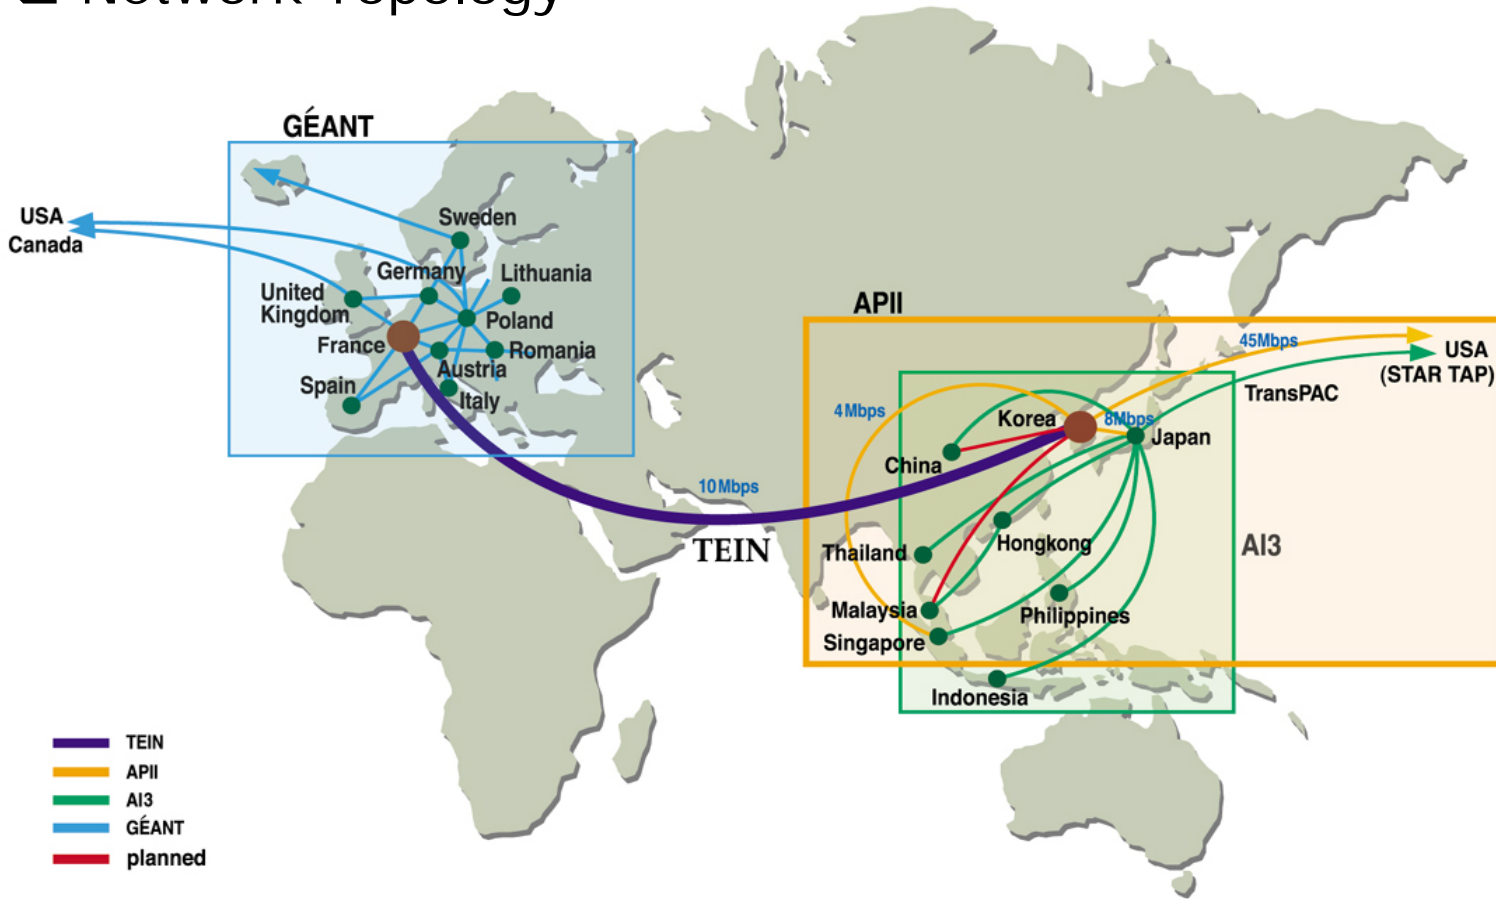

Trans Eurasia Information Network

1st link: Korea- France 2001 (2 Mbps)

International Research Networking

Network Topology

International Research Networking

Step-change to TEIN2

- Intra-Asia regional network
- Asia-Europe inter-regional links
- 10M Euro European Commission funding + funding by Asian partner countries
- TEIN2 programme:
 - build and operate regional network,
 - promote network usage,
 - train technical staff in developing countries
 - Reduce digital divide

TEIN3

DANTE

TEIN2 Partner

Countries/representatives

International Research Networking

Asia Pacific:

Australia (AARNet)
China (CERNET)
Indonesia (ITB)
Japan (MAFFIN, NICT, NII)
Korea (NIA)
Lao (LERNET)
Malaysia (MDC)
Philippines (ASTI)
Singapore (SingAREN)
Thailand (ThaiREN)
Vietnam (MOST)

Europe:

France (RENATER)
Netherlands (SURFnet)
UK (UKERNA)
DANTE

Also supported by:

TRANSPAC2
Juniper Networks

High Performance Applications

International Research Networking

★

DANTE

eVLBI 28 Aug 2007

International Research Networking

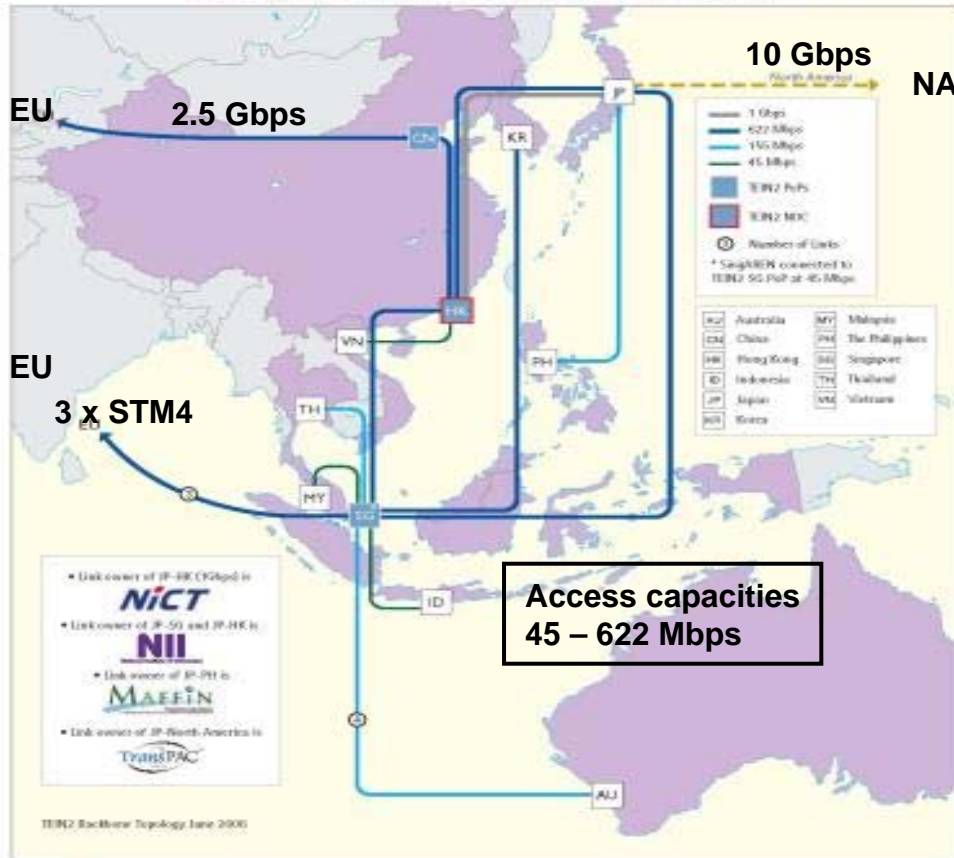

Excellent inter-domain networking performance across

CSTNET + CERNET+ TEIN2 + ORIENT + GEANT2 + SURFNet
+ AARNet

TEIN2
 Regional Connectivity for Asia-Pacific
 Research and Education
 Linking Asia-Pacific to Europe and beyond

www.tein2.net

International Research Networking

**TEIN2 network
started Jan 2006,
connects:**

- 30M researchers and students
- 4000 institutions
- 10 countries

**PoPs in Singapore, HK
Beijing + Tokyo; NOC
in HK**

**Funded to Sept 2008,
then.....**

TEIN3

International Research Networking

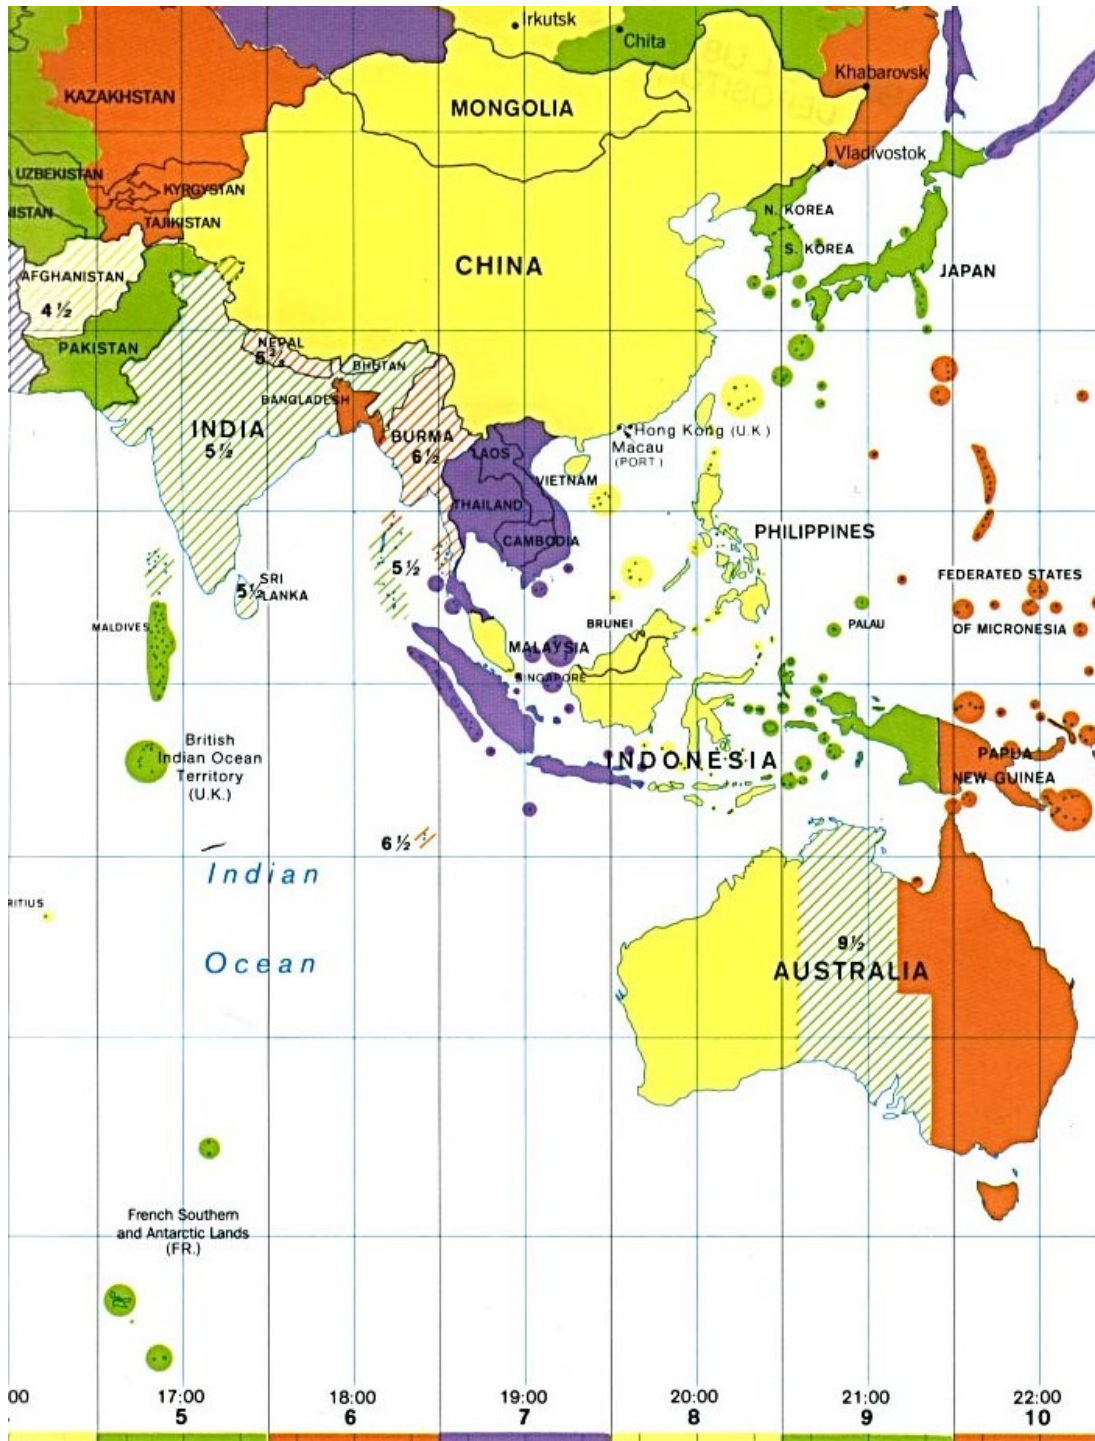

...TEIN3 Network project!

- EC funding committed to end 2011
- Extend to S Asia
- Further support for application development
- Transfer TEIN3 programme to Asian ownership
- Plan for 'TEIN4'

TEIN3

DANTE

International Research Networking

Timezones and Populations

TEIN2:

Member countries represent 1/3 of the world's population in a timezone range spanning only 4 hours

TEIN3

Potential member countries represent almost 60% of the world's population in a timezone range spanning only 6 hours

Challenges for TEIN3 tender

International Research Networking

- Access to Infrastructure
- Price (not cost) of Infrastructure
- Deregulation and market competitiveness

Affordable connectivity needed for Thailand, Indonesia, Vietnam, Lao (and later for S Asian countries)

TEIN3

DANTE

TEIN3 Connectivity Requirements

International Research Networking

- Asia-Asia and Asia-Europe connectivity
- Whole point to point circuits
- End to End connectivity between specified Asian NREN routers, TEIN3 hubs and GEANT2 hubs
- Replace and upgrade current TEIN2 network
- Gather RFI information for South Asia network expansion

TEIN3

DANTE

TEIN3 Technology Requirements

Preferred:

- Point to point wavelengths, SDH or PDH circuits
- Terrestrial circuits

Will be considered:

- Layer 2 permanent virtual circuits FR or ATM
- Layer 2 or 3 VPN services
- Satellite (last resort)

Not Wanted:

- Managed IP and Internet Access services

TEIN3 Network Topology

- To be determined from the tender results (not pre-defined)
- Current TEIN2 hub locations to be reviewed
- Europe-Asia links only West from Asia, likely to be 622Mbps, 2.5 or 10 Gbps
- Intra-Asia links likely to be in range 155Mbps to 10Gbps depending on partner needs, affordability by project and partner, and topology requirements

Tender Timescales

International Research Networking

March/April 2008:

- Contract Notice published in EU Official Journal and on DANTE website
- Organisations interested in participating in the tender will need to submit Expression of Interest

April/May 2008:

- Initial tender documentation sent to interested organisations

May – Sept 2008

- Tender discussions and negotiations (timetable subject to tender procedure adopted)

September/October 2008

- First Contracts awarded

January 2009

- TEIN3 network starts service

Evaluation Criteria

- Cost of ownership/affordability
- Fitness for Purpose of Solution
- Supplier financial health
- Supplier track record

Contracting

- Tender procedures to be defined
- Number of contracts awarded is negotiable
- All contracts with DANTE initially
- Contract commitments expected to be minimum 12 months, possibly longer

International Research Networking

**Thanks for your interest/participation
in our tender!**
